

SACKSAFOAM™ III

FIREFIGHTING FOAM INJECTION SYSTEM FOR THE BAMBI BUCKET®

The Sacksafoam™ III is designed to be used in medium and heavy lift helicopters in combination with the large series of Bambi Bucket®s (models 5566HD to HL9800). The SF III is identical to the SF II model 5598, with the exception of the control unit, which is built into the lid of the case. The operation of the system is performed by a member of the crew other than the pilot or copilot.

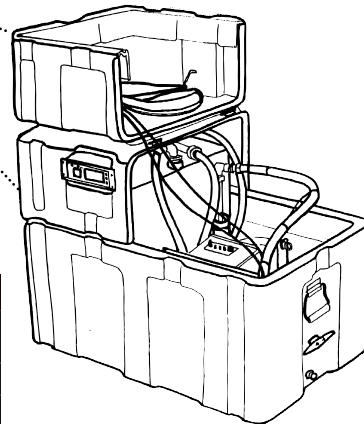

TOP FEATURES

- Self-contained foam injection system mounted onboard the helicopter.
- Eliminates any potential for spillage from the pouring of foam concentrate.
- Allows for a multitude of nonstop cycles.

UNIT EASILY INSTALLED AND REMOVED

DURABLE CASE

USER-FRIENDLY FUNCTION CONTROLS
